

Conference Scope

The current challenges arising from the spread of newly emerging viral pathogens affecting humans, animals and plants, have evoked the investigational resources of several scientific organizations and institutes to manipulate and mitigate such challenges. Based on the available data and information and the outcome of the research topics related to viral infections, the ESV is proud and has the honor to announce to organize the “ Third International Conference of Virology”

Conference Main topics

- **Epidemiology of newly emerging viral disease.**
- **New trends in vaccines and vaccinology**
- **Different strategies of anti-viral approaches.**
- **Advanced technology in the production of viral diagnostics.**
- **Virus evolution and diversities.**
- ◆ **Novel diagnostic methods using chip technology.**

Call for Papers

Participants are asked to submit full text papers. The abstract should highlight the major contents and results of the paper and written as MS word 2003 with font bold single spaced 14. The paper should be written as MS word 2003 with font bold single spaced 14 for title, 1.5 spaced 13 for authors and 1.5 spaced 12 for body of the text. All the accepted articles will be published in the Egyptian Journal of Virology noted that the deadline for abstract submission will be September 1, 2010 while the deadline for full text will be October 1, 2010.
