

We cordially invite you to the **2018 GfV Cell Biology of Viral Infections Workshop** taking place **October 15-17 2018** at Kloster Schöntal.

The workshop traditionally aims at fostering scientific exchange among young and experienced scientists working on cell biological aspects of viral infections.

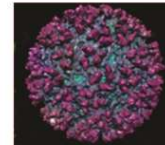

This year, the topic will be “**High resolution approaches in virology: from cell ultrastructure to OMICS**”. Four international renowned scientists (Professors Gisou van der Goot, Félix Rey, Kay Grünewald, and Ileana Cristea) with unique expertise in crystallography, electron microscopy, and OMICS will share their experience and vision of the cell and viruses with us.

SAVE THE DATE

2018, October 15th to 17th - Schöntal (Germany)

17th Workshop
“Cell Biology of Viral Infections”
Of the Society for Virology (GfV)

High resolution approaches in virology: from cell ultrastructure to OMICS

by **Professors Gisou van der Goot, Félix Rey, Kay Grünewald, and Ileana Cristea**

Chairs: Gisa Gerold, PhD, Institute for Experimental Virology, Twincore, Hannover
Pierre-Yves Lozach, PhD, CellNetworks, Center for Integrative Infectious Diseases, Heidelberg
